DETAILED ACTION

1. Applicant's election without traverse of Group I in the reply filed on June 7, 2006 is acknowledged.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Bourland (US 2,209,725).

Bourland discloses a transition rail having all the features as recited in the instant claims, including first transition zone (c), second transition zones (a), and third transition zone (b) - see the attached Figures 3 and 5 of Bourland, Exhibit A, which are provided with examiner's annotation thereon.

4. Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Curtis (US 607,221).

Curtis discloses a transition rail having all the features as recited in the instant claims, including first transition zone (c), second transition zones (a), and third transition zone (b) - see the attached Figures 1 and 2 of Curtis, Exhibit B, which are provided with examiner's annotation thereon.

Regarding instant claims 3 and 7, note that zone (b) of Curtis is a constant cross-sectional shape.

Art Unit: 3617

5. Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
